SUMMARY

I am a Finance and Customer Service Associate turned Front End Engineer. I'm highly skilled in React, Redux, problem solving, analysis and communication. I'm an empathetic developer who thrives in teams and loves learning new skills.

PROJECTS

CoderDojo Colorado

🔗 https://github.com/ehk9000/Coder-Dojo-Colorado

CoderDojo is a global volunteer-led charity providing free programming workshops for young people between 7 and 17. This app provides a way for the independently run Dojo locations in Colorado to keep track of their student's attendance and for the leaders of the Dojos to create and edit events for their classes.

Built using:

Apollo GraphQL || React || Redux || Travis CI || Jest & Enzyme || Heroku

Trapper-Keeper

🔗 https://github.com/ehk9000/Trapper-Keeper

A three-person project that replicates the note taking service Google Keep. It is a note-taking app where the user can make unlimited list items per note, as well as change the color of the note itself. The learning goals of the project were to create our first Node and Express server in addition to making a complex and dynamic form.

Built using:

React || Redux || Thunks || Node || Express || Jest & Enzyme

Movie Tracker

🔗 https://github.com/ehk9000/MovieTracker

A two-person project where the user can see movies currently in theaters as well as the movie's IMDB score. The learning goals of the project were to create our first app using Redux and Thunks, in addition to navigating a public API for the first time.

Built using:

React || Redux || Thunk fetch calls from an API || Jest & Enzyme

Board, Not Bored

🔗 https://github.com/ehk9000/Board-Not-Bored

A four-person project that details various board games, their difficulty, and number of players. It also displays bars in Denver that offer board games. it is my first project using React. The learning goals of the project were component structure as well as React syntax.

Built using:

React || Javascript || Fetch calls from an API || Jest & Enzyme

EDUCATION

Bachelor of Arts: International Political Economy

Colorado College

Front End Engineering Program

Turing School of Software and Design

EXPERIENCE

Specialized Service Assocaite

Oppenheimer Funds Services

📅 10/2017 - 11/2018

Processed trades and educated clients on the tax features of retirement and 529 college investments

SKILLS
